

Annette, Gunars Ceksters and I were very pleased to be at the OEA gala last week and see NRstor Inc. win the 2015 OEA Emerging Company of the Year award.

I know the tradition of this award is reasonably new and the winners over the years have gained new significant places in the marketplace. NRstor Inc. will continue this legacy.

I know since you and your talented team have entered the storage marketplace there has been on-going developments that recognize the importance of this new initiative. Your fly wheel installation in Ontario reflects the first of its kind here, and I know you're looking for further developments. Your role and that of NRstor Inc. does to us represent a game changer going forward. Lots of new exciting challenges, but again we sense your group are embracing these opportunities. All the best going forward.

Congratulations from your friends at the Ontario Energy Network!

Well done.
